

CRANE OGP DIRTY WATER PUMP

Setting a new bench mark

The latest technology in submersible Macerator Pumps

The Crane OGP pump is a very heavy duty submersible macerator pump with a unique 2 stage vortex impeller system capable of heads up to 60 mtrs which is twice the head of most other available macerator pumps.

Ideal for pumping either farm dirty water, industrial waste or domestic sewage. The OGP comes with an excellent pedigree having been originally designed for the American pressurised sewage system market and used extensively in this country by Water Authorities for pumping raw sewage over long distances.

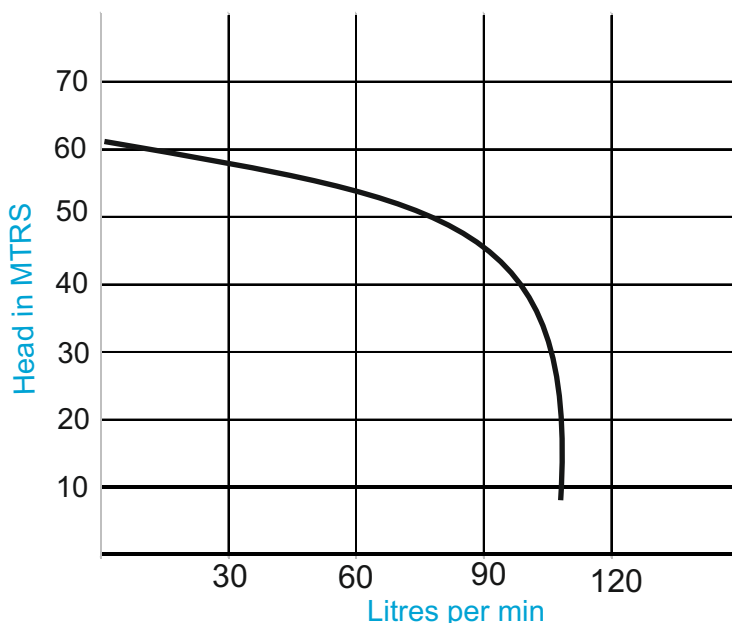

The powerful 2 HP motor is available in single phase or three phase.

OGP Features and benefits:-

1. 2 stage Vortex impellers for solids handling and high head performance
2. Exclusive slicerator. The staggered slicing action of the grinder eliminates clogging with particular troublesome objects.
3. Long life silicone carbide mechanical seal.
4. Quick disconnection cord.
5. Inbuilt anti-syphon check valves.
6. Oil filled motor with overload protection.
7. Angular contact bearings L-10 rating.
8. Interstage passage.
