

THE NEW SHAPE OF EFFICIENCY

STANDARD VERSION
£365

X VERSION
£405
(suction kit extra)

Divertron is a range of submersible pumps with integrated on/off electronics for domestic water supply. Ideal for irrigation and gardening and for the re use of rainwater, it can be installed inside collecting tanks, wells and tanks with a maximum immersion depth of 12 metres.

KIT X FILTER & BALL FLOAT

Attached to the special filter designed for Version X, this accessory prevents water from being sucked up from the very bottom of a well or tank, so that sludge, dust or debris is not drawn in. The kit is ready for use because the connecting tube is already included.

£45

The integrated electronic card manages starting and stopping of the pump automatically in relation to the water demand, without the need to install an external controller. This prevents dry running of the pump in the event of a prolonged shortage of water. Easier to install and safer to use.

MAXIMUM FLOW	up to 6 m ³ /h
MAXIMUM HEAD	up to 45 m
P1	up to 920 W
P2 NOMINAL	up to 0,56 Kw
MAXIMUM	12 m
MAX AMBIENT AND	+40 °C
FACTORY CUT-IN:	2,4 bar (±0,2)
DELIVERY THREAD:	1"
PUMP MAXIMUM	160 mm.
DIMENSIONS:	Divertron

NON RETURN VALVE

The non-return valve ensures quick and safe initial installation, allowing immediate priming.
