

LARGE PRESSURE TANKS

Pressure tanks can be coupled to water pumps (surface or submersible) to provide a self-contained pressure supply for direct connection into an existing piped system without the need for header tanks or float switches.

Available in a range from 24 litre to 500 litre.

500 ltr only available in vertical form.

A larger tank provides a greater reserve of water stored under pressure to cope with peak demands and will minimise the on/off switching rate of the pump, prolonging the life of the pump.

TANK SIZE (LTR)	Max pressure	Connection Size	H (mm)	W (mm)	L (mm)	Price (bare tank)	Control system
24 ltr horizontal	8 bar	1"	300	320	350	£ 80.00	£ 140.00

Control systems come complete with:

All prices subject to VAT

- Pressure switch
- Pressure gauge
- Non return valve
- Isolating valve

Also available with 2,3, & 4 way outlet manifold

Note:

Tank air pressure must be checked regularly and inflated as necessary. Failure to do so could result in damage to membrane and/or pump.
