

SPS EFFLUENT PUMPING STATIONS

Complete ready to operate pumping systems.

Suitable for:-

Domestic and Industrial sewage
Septic Tank
Soak away water

Quick and easy to install - Minimise building and plumbing costs

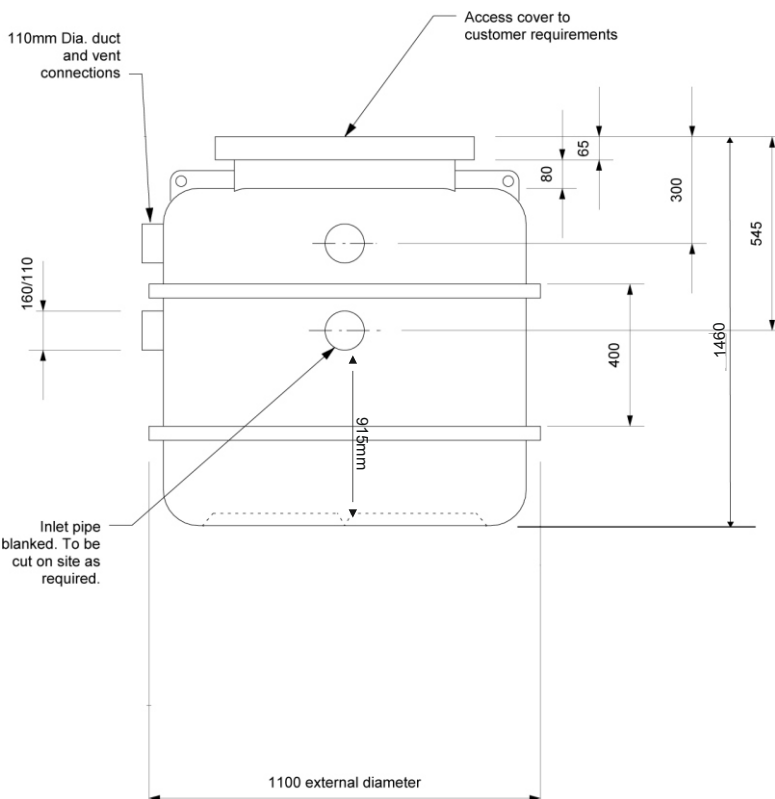

The SPS system consists of a moulded one piece high density linear Polyethylene tank, containing a submersible pump ready rigged with all necessary internal pipe work, quick release couplings, float switch, isolating valve, non return valve etc and complete with 110mm drain inlet coupling and discharge pipe coupling.

The standard system is based on a 1.5 meters deep tank of 1000 litre capacity but tanks are available upto 4.5 meters depth and up to 8000 litre capacity. A wide range of pumps can be fitted according to the application, including vortex pumps, cutter pumps and macerators.

Complete with 10 tonne access cover.

Dimensions:-

SPS systems are also available fitted with two pumps which operate alternately ensuring equal usage and automatically checking for correct operation. In the event of a failure or blockage an audible or visual alarm is triggered and the faulty pump can be removed for servicing without interrupting operation of the second pump.

Ideal for housing developments, camp sites etc where a backup system is essential.

1000 Litre heavy duty tank liner with 110 mm drain inlet & ready rigged with:-

- Pump
- Float switch
- Non return valve
- Isolating gate valve
- Flexible connecting hose with quick release couplings
- Pump support bar and chain
- Coupling to outlet pipe
- Heavy-duty galvanised inspection cover

MODELS

SPS JS400SV/1000

Fitted with JS400SV 2" heavy-duty vortex sewage pump
Includes electrical control box with main isolating switch
and automatic overload cut-out.
For standard domestic sewage or waste water with
suspended solids

£1395.00

SPSJS750SK/1000

Fitted with JS750SK 2" heavy-duty sewage cutter pump
Includes electrical control box with main isolating switch
and automatic overload cut-out.
For domestic or industrial sewage, farm waste etc

£1775.00

SPSJS750SV/1000

Fitted with JS750SV 3" heavy-duty vortex sewage pump
Includes electrical control box with main isolating switch &
automatic overload cut-out. 3" internal plumbing.
For 3" I/D (or larger) outlet pipe
For domestic or industrial sewage, farm waste etc

£1575.00

Pumps can be mounted on guide rail system if required. Systems are also available with larger tanks, larger pumps, macerator pumps. Also **dual pump systems** with automatic changeover, or 3 phase pumps

CARRIAGE TO UK MAINLAND

£60.00

Optional extra high/low level warning light alarm system for all pump units

£130.00 + VAT
